

# Ridgeway School Eco Code

We save energy by switching off lights, pc's and printers

We develop environmentally friendly areas around school

We take part in annual eco campaigns

We will develop a student mentoring scheme to help and support each other

We use less single use plastics in school and more reusable products

We organise community litter picks

We will work with teachers to include more eco activities in the curriculum

We save water by turning off taps when we've finished

We will try and use more seasonal and healthy foods in cooking
